OBJECTIVE

Software Engineering student at Kennesaw State University with hands on experience building multithreaded Java applications and React-based web applications. Skilled in Java, Python, JavaScript, REST APIs, and client-server architecture with experience collaborating in Agile development environments. Passionate about building scalable software solutions and applying object-oriented design principles to real-world engineering problems.

EDUCATION

Kennesaw State University | Marietta, GA

Expected: May 2027

Bachelor of Science in Software Engineering

GPA: 3.5

Relevant Coursework:

Data Structures & Algorithms, Object-Oriented Programming, Database Systems & SQL, Multithreaded Programming, Software Design & Development

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript, C#, SQL

Frontend: React, HTML/CSS

Backend & Concepts: REST APIs, Client-Server Architecture, Multithreading, Object-Oriented Programming

Tools: Git, GitHub, VS Code

Development Practices: Agile Development, Debugging, Testing, SDLC

Languages: English, Spanish (Bilingual)

RELEVANT PROJECT EXPERIENCE

Chat Application, Kennesaw State University

April 2026

- Developed a real-time Java chat application supporting concurrent client communication using multithreaded socket programming and client-server architecture.
- Improved message reliability and scalability by implementing input/output stream communication protocols and object-oriented class design.
- Utilized Git/GitHub for version control, debugging, and collaborative code management.

Event Friend Web Application, Kennesaw State University

June 2025

- Collaborated with a 4-person development team to design and build a web application that helps users discover and plan local events.
- Utilized React and JavaScript to implement interactive user interface components.
- Participated in code reviews and testing to ensure functionality and alignment with project requirements.
- Presented the final project, explaining application logic, development process, and team contributions.
- Gained hands-on experience in full-stack development, agile collaboration, and project lifecycle management.

WORK EXPERIENCE

Dollar Tree, Dallas, GA

Nov. 2023-Present

Sales Floor Associate

- Deliver consistent customer service by assisting shoppers and resolving inquiries in a fast-paced environment.
- Delivered customer support in a high-volume retail environment while balancing multitasking, problem-solving, and transaction accuracy under time constraints.
- Assisted 50+ customers per shift and resolved issues efficiently, strengthening communication and adaptability skills in fast-paced situations.
- Collaborated with team members to maintain operational efficiency, inventory organization, and consistent store presentation standards.
